

Cyber Liability

Cyber Liability (or Cyber Risk) refers to a range of coverage designed for organizations involved in e-commerce and the Internet. Different varieties of Cyber Liability exist for different types of business conducted via the Internet; we will determine which coverage is best suited for your business. The following Cyber Liability exposures may apply:

- Unauthorized Access
- Introduction of a Virus
- Libel & Defamation
- Copyright Infringement
- Privacy

Based on the information gathered from our Cyber Liability application, we will customize a policy that best suits your needs. Among the factors taken into consideration when underwriting risks for Cyber Liability are:

- Client/vendor contracts
- Operational controls
- Computer systems controls
- Computer systems access protection
- Data backup procedures
